ENGINEERED FOR THE OUTDOORS

Saige delivers the natural beauty of real timber without the drawbacks leaving you more time to enjoy your outdoor space.

WELCOME TO SAIGE

We are pleased to present the Saige collection.

Saige delivers the natural beauty of real timber without the drawbacks.

Designed in Britain, Saige provides premium outdoor living composite products of decking, cladding, fencing, gates, balustrades, and complete subframe systems. Saige features a variety of contemporary and traditional finishes that are matched with a timeless colour palette designed to enhance your outdoor space for years to come.

Our team has created a range of premium, sustainable outdoor products engineered for the outdoors that combine durability, style and exceptional performance, allowing you to spend more time enjoying your outdoor space with Saige.

WHAT GARDEN DESIGNERS SAY ABOUT SAIGE

Find out more about Emily Crowley-Wroe and April House Design here

“We chose Saige Grey Rustic decking for The Hide Garden at RHS Malvern Spring Festival to create a more expansive feeling in a small space, that evokes the restorative and calming effects of the riverscape.”

The Hide Garden designed by Emily Crowley-Wroe went on to win Silver Gilt and Best Show Garden.

Rustic grey decking 

Designed For Durability

Saige anti-slip composite decking is designed and manufactured from recycled materials for the Great British outdoors. We have three ranges to choose from with a range of finishes and a colour palette to suit both residential and commercial applications. All are anti-slip, low maintenance, splinter-free and 100% quality inspected.

Contemporary charcoal fencing

Contemporary grey decking

CONTEMPORARY

Our Contemporary range will bring your outdoor space to life with reversible wood grain and grooved boards for a truly stunning finish. Saige composite materials are made from 90% recycled materials, have a low slip potential, and can be used for various applications, allowing you to make the most of the available space.

To complement your garden's borders, our Contemporary collection includes fencing and gates in the same colour palette.

DIMENSIONS: 143mm x 23mm x 3600mm

TRADITIONAL

The traditional decking board range is capped with two contrasting colours, creating a distinctive dual-tone appearance. This unique dual-tone appearance can be employed as a design element to divide off your outside spaces or frame your space.

Our 10-year warranty supports this collection in addition to having exceptional levels of strength and durability and strong resistance to UV fading.

LIGHT GREY & EBONY

DIMENSIONS: 143mm x 23mm x 3600mm

RUSTIC

The Saige Rustic range of composite decking has been created to look and feel like authentic weathered timber. With a deeply embossed wood grain texture, rustic solid composite decking boards offer the best slip resistance in dry and wet weather conditions.

Like all Saige decking, the Rustic collection provides minimum maintenance by eliminating the need for sanding, painting, and sealing at any time in the future.

Premium Sustainable Cladding

Saige composite cladding offers a stylish and sophisticated look that will elevate the appearance of your home. With three distinct ranges, they are available in a colour palette that seamlessly blend with our Saige contemporary decking, fences, balustrades and gates, allowing you to create a cohesive and harmonious outdoor space.

CASTELLATED

The castellated cladding profile features a unique design with alternating raised and recessed sections. This profile adds depth and visual interest creating a dynamic and modern look for buildings. The raised sections not only enhance the aesthetic appeal but also provide additional shadow lines, adding to the overall texture and dimension of the facade.

Castellated cladding is a popular choice for contemporary architectural designs seeking a distinctive and eye-catching exterior finish.

Urban cladding range

*Resistant to mould
and fungus*

URBAN

Our Urban range is characterised by a deep embossed woodgrain finish. Its modern and streamlined design features a narrower profile in contrast to our Heritage range, yet it offers the same advantages, providing your home with a unique contemporary charm.

HERITAGE

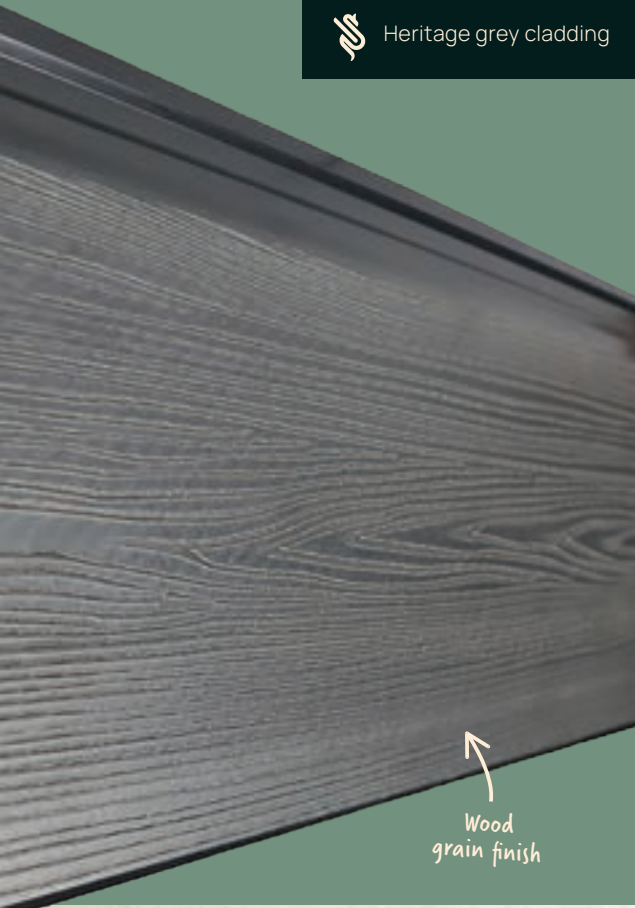

Heritage cladding is the perfect solution for a long-lasting, low-maintenance, and protective upgrade to any property. It's a durable alternative to traditional timber cladding and is available in a range of four colours that will complement our contemporary range of decking, fences, and gates. The deep embossed woodgrain finish will give your property a modern yet classic look.

Heritage cladding is manufactured using a honeycomb profile that offers a higher width board than Urban, making it perfect for a deeper cladding aesthetic. We offer a range of complementary trims to complete your cladding project.

Premium Sustainable Fencing

Designed to outperform the rigours of the British weather, our fences have been tested to withstand gale force nine winds. Saige fences and gate panels are easy to install and can be retrofitted to existing concrete posts. The range are available in the same grey, charcoal, driftwood and coffee colour palette to match our contemporary decking range.

Resistant to mould
and fungus

FENCING

Saige composite fencing has numerous advantages that make it an attractive addition to your garden, including aesthetics, endurance, minimal maintenance and the capacity to withstand force nine gales.

Saige fencing offers retrofit solutions for use within existing concrete posts or against brick walls. Angled brackets create a multitude of angles without the need for double posts. The fencing won't warp or rot, is splinter free and looks just as good either side of the fence making our composite fencing a sustainable and cutting-edge choice.

Saige balustrades

Saige balustrades are built to last and require little upkeep over the long term. Not only will they never need to be painted or stained, but they are also UV stabilised for the Great British outdoors. Free of splinters, our balustrade range includes handrails for stairs.

Our range of balustrades works perfectly with our Contemporary composite decking and fencing. Angled brackets are available to create various angles without the need for double posts.

Complies with building regulations.

Premium Sustainable Gates

To complement our fencing and decking range, which includes fire-resistant options, we have designed and engineered a range of composite gates and driveway gates to provide a completely eco-friendly alternative to timber.

Our low-maintenance gates are made from sustainable recycled materials and have a high level of UV stability, which means they will retain their colour for years with no staining or sealing required.

High- strength Subframe Solutions

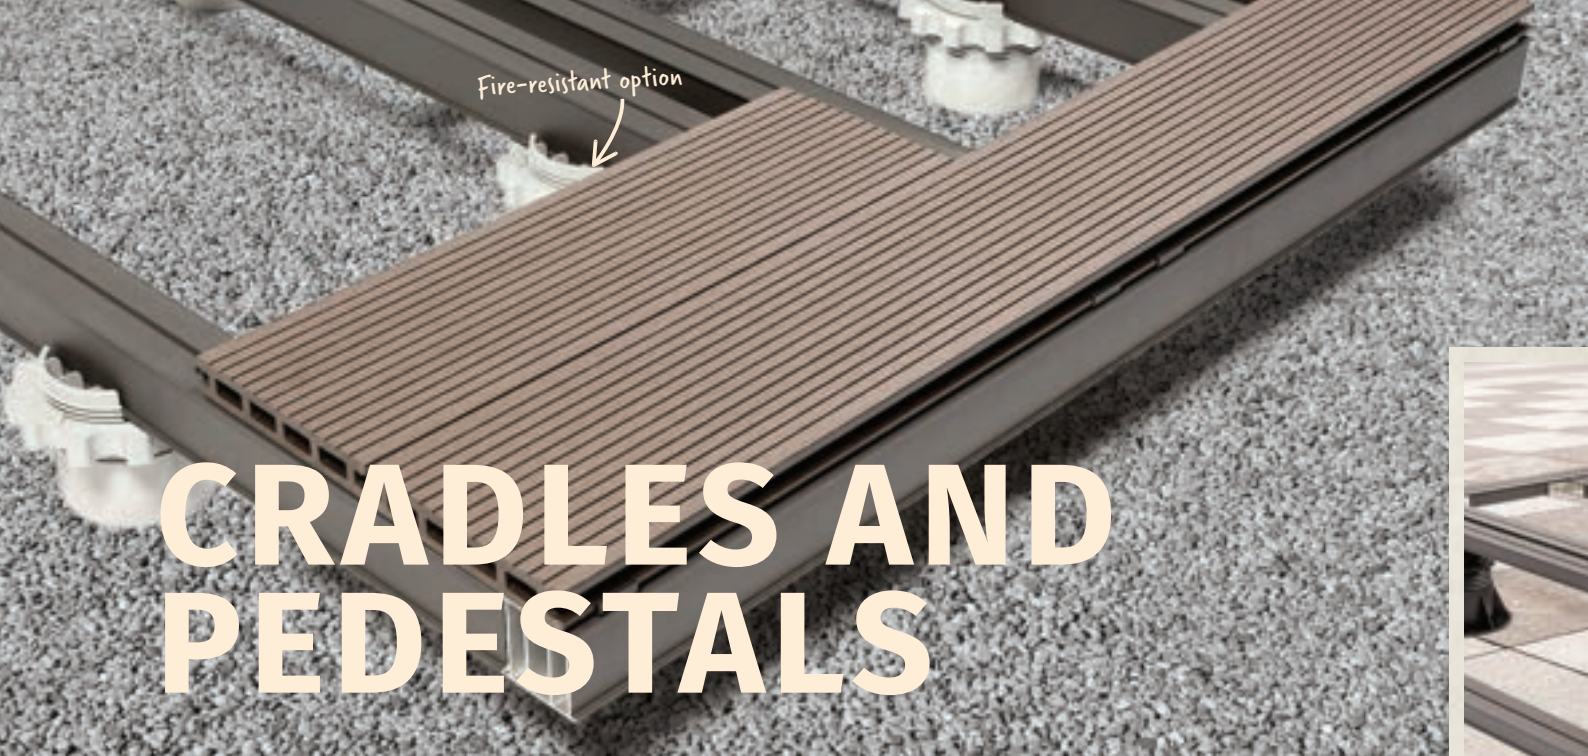

Saige has designed an all-encompassing subframe system to provide a higher level of security from the ground up for your investment.

The Saige subframe system offers a comprehensive decking support system that is comprised of variable-height joist cradles, pedestals, and high-strength aluminium joists, resulting in a system that is highly versatile and adaptable. Fire-resistant alternatives are also available for use in residential and commercial construction projects.

uses a complete fire resistant system

Fire-resistant option

CRADLES AND PEDESTALS

Building a deck with Saige joist cradles and pedestals is fast, easy, and clean; this is managed without sacrificing the deck's strength or security. The height of each lightweight Saige pedestal can be easily adjusted, even while the bearer is being held. Built-in self-levelling heads will compensate for awkward gradients so let Saige take the load for you.

JOIST DIMENSIONS:

Option 1: 3.6m x 50mm x 25mm

Option 2: 3.6m x 50mm x 50mm

Fire Resistance Rating
BS EN13501-1Bfl
for Hollow & Solid Decking.

JOISTS

DECKING DIMENSIONS:
3.6m x 143mm x 23mm

Saige aluminium subframe joists have been powder coated to prevent them from being visible through decking gaps and improve your deck's aesthetic. The subframe joists' structure is durable and can work over much longer spans, reducing the number of pedestals and cradles required, which means a quicker and simpler installation. Supports can be placed every 800mm on a 50mm joist and still provide maximum strength.

PEDESTAL HEIGHT RANGE:

18-42mm, 61-87mm, 85-185mm

Finished floor levels achievable with Saige decking from 66mm – 1093mm.

Height adjustable

Peace of Mind

Designed for the Great British outdoors, Saige premium sustainable products are constructed from around 90% recycled materials. In addition, they are 100% quality inspected during the manufacturing process to assure high-strength, high-quality, low-maintenance, mould- and fungus-resistant products.

Once installed, Saige requires minimal maintenance, including the removal of spills with a mild detergent and moist cloth and an end-of-season brush or jet wash. That is all! Using Saige means spending more time with loved ones in your outside space.
